

**The water in a stream is natural, fresh and wild.
In your bathroom, it is**

HANSAMOTION.

 **HANSA**
experience water

Just like from a mountain stream: thanks to its unique shape, a HANSAMOTION water stream reaches your skin in its original form, feeling more alive and full of energy. The water flows through an open, curved spout. You can choose between a deck mount or wall hung design; both are equipped with the characteristic, slender levers. Especially when compared to clear, geometric bathroom architecture, HANSAMOTION adds some exceptional touches.
